

I'm better
than you!

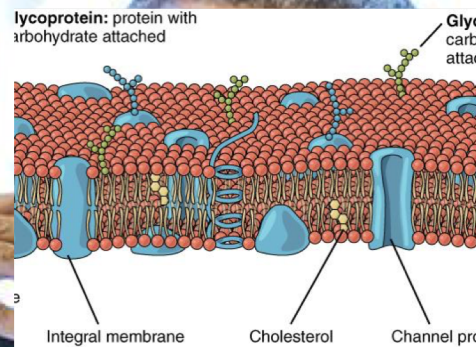

Cell Membrane for President

Cell membrane will make the cell great again.

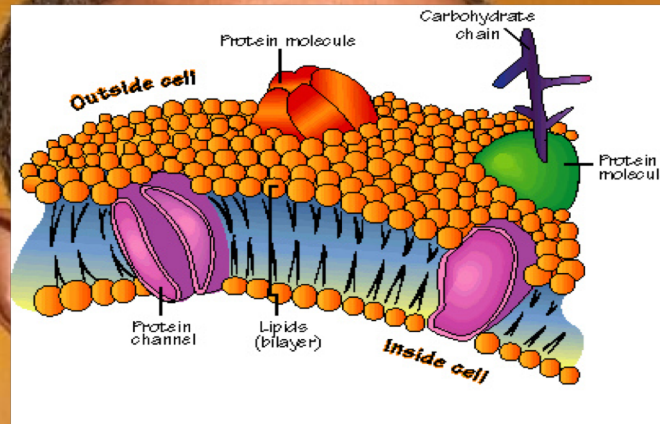

Opening Statements

Cell membrane is da best because without the cell membrane the cell wouldn't be able to control what came in and out of the cell. That includes food, water, and other things that the cell needs to survive.

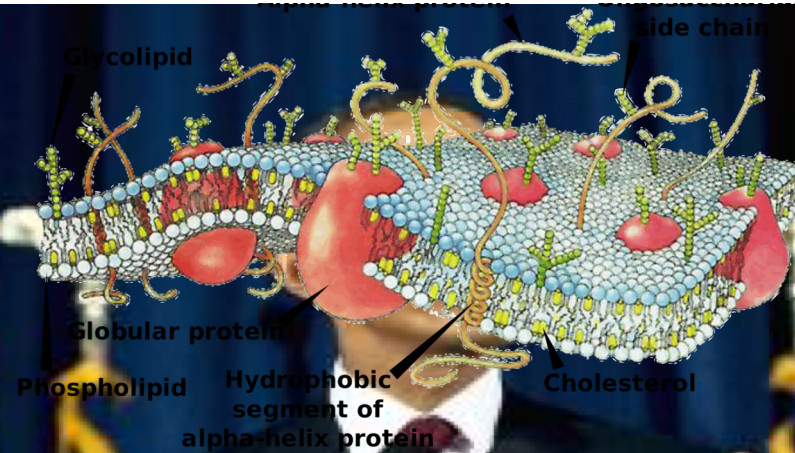

What makes you a good candidate?

The cell membrane makes a good candidate because without it the cell wouldn't be able to work, because the cell membrane controls what come in and out of the cell. If food and things like solar energy couldn't come into the cell the plant would die.

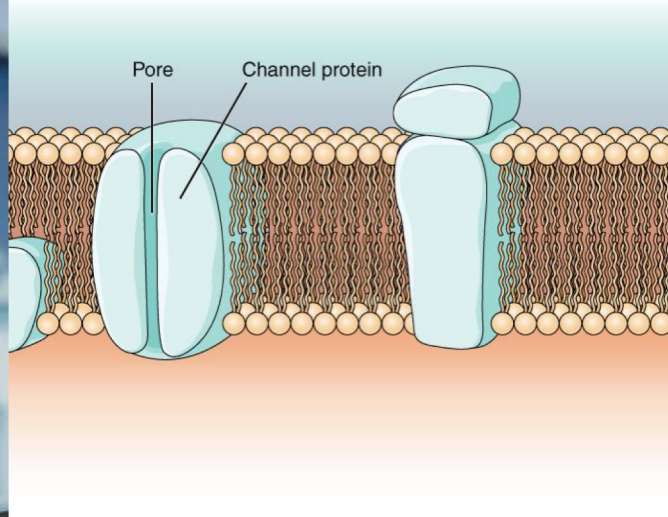

How can you help make the cell a better place?

We can get more food in for the cell so that we have a better chance of survival. I can help by controlling what comes in and out of the cell so that what needs to come in comes in and what needs to stay out stays out.

What would you do if given the power of
presidency?

If given the power of presidency the cell membrane would work it's hardest to make sure the cell gets 2 times it's normal amount of nutrition to make the plant cell stronger.

What can you offer that makes you a suitable candidate?

We can offer to let more food and solar energy into the cell every day to provide the plant quicker growth time and better health.
