

# Mitochondria(n) for President:

Team 3

# Mitochondria is good candidate because...

Mitochondria will give food to each part of the cell and make the operation smoother. Mitochondria will power the each part of the cell.

VOTE MITOCHONDRIA.  
LEADER. ENCOURAGER.  
SUPPORTER.

Mitochondria are natural leaders. They make the energy for a cell and keep it happy and energized. Mitochondria are here to support and encourage you!

Mitochondria is obviously the best choice for this election because it has its own DNA and two membranes. These properties make it tough and mean it could survive under any condition.

# Mitochondria will make the cell a better place...

Mitochondria is an organelle found in the large numbers in the most cells, in which the biochemical processes of respiration and energy and production occur. It has a double membrane, the inner layer being folded inward to form layers (cristea).

Mitochondria will make the cell a better place because it can feed the other parts of the cell.

If given the power of presidency mitochondria will make the cell a better place by making it more efficient.

Mitochondria power the cell and make sure that it is protected with its double membrane. Mitochondria will make things smoother and make sure every organelle has food to power itself. This will make the cell smoother.

Mitochondria  
can offer a  
more efficient  
environment

Mitochondria is better because it can  
make the cell more efficient and allow for  
the cell to work better.

# What the mitochondria has and other candidates don't

Mitochondria has the ability to feed other organelles. Other Candidates don't have the ability to feed other organelles. Mitochondria can make the cell more efficient by feeding everyone and the cell membrane can't nor can the cell wall.

After all you've seen, vote Mitochondria(n). Mitochondria(n) wants to make the cell a better place. Mitochondria will help with everyone having a sufficient amount of food. Mitochondria(n) will make the cell more efficient and better for everyone. It will supply Adenosine Triphosphate( food) to everywhere.

That was why you should Elect mitochondria(n) for president of the cell

**VOTE MITOCHONDRIA.  
LEADER. ENCOURAGER.  
SUPPORTER.**
